

MS1 (end of P0): closure verdict; $\kappa \geq 0.70$, recall $\geq$ floor, a judge beats the control

MS2 (M4): configuration freeze; no hash, no gold

MS3 (M14): screening gate; pooled $\Delta\text{AUROC} \geq \delta$, lower bound $> -\delta/2$

MS2b (M23): H-OSS freeze of the code lenses

MS4 (M24): V5 pilot; simulated size ≤ 450 areas, $\alpha \geq 0.80$

H-OSS (M33): the MS5 rule on H-OSS only; cannot stop or license H2

MS5 (M38): H2 test; lower bound > 0 , point $\geq \delta$

MS6 (M46): H3; yield ratio > 1 , point ≥ 1.25

MS8 (M46): novice error excess in confirmed residual areas

MS7 (M48): organizational pilot; map beats controls, legal route workable
